

The Gateway to Success Project

A virtual hub to support all learners

STAGE 1: DEVELOPMENT

- Determine the functional needs of each support service
- Install, configure and test relevant plugins
- Create sample content to demonstrate how existing Moodle features can meet functional needs
- Demonstrate sample content to staff

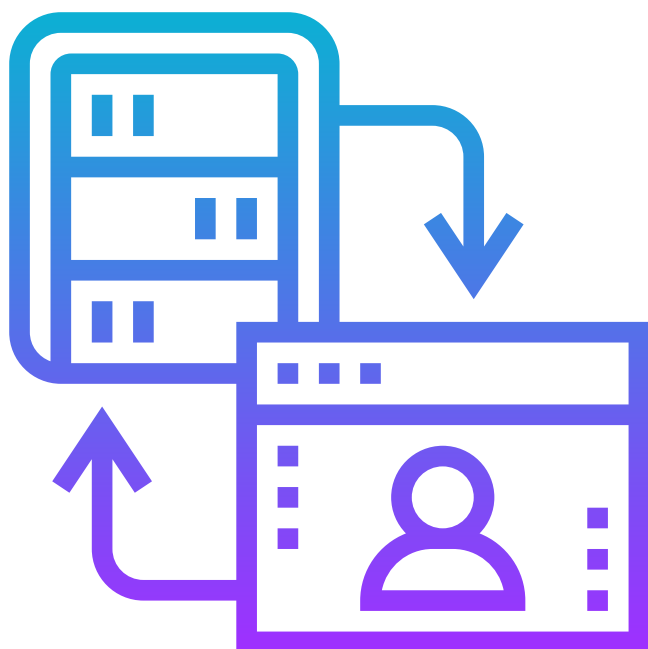

This stage is now COMPLETE

STAGE 2: DESIGN & BUILD

- Design and build the infrastructure for the Hub dashboard
- Ensure compatibility with a range of devices including mobile-compatibility
- User-testing with staff and students

This stage is ONGOING

STAGE 3: DATA ANALYTICS

- Select reporting tools and build analysis and reporting capability
- Develop suite of reports to analyse student interactions and resource usage

This stage is ONGOING

STAGE 4: TRAINING

- Train support services staff in the required technical skills, tools and techniques required to maintain the Hub

This stage is ONGOING
